Who Are We?

We have over 600 customers within Pembrokeshire with our existing successful brands CCTV4U & Alarms4U, As these technology based industries have developed, products are able to communicate with each other and their users in a more secure way. To progress with this technology we no longer see the need to separate these sectors but unite them under the one umbrella of Secure-I-T.

Here's what our Customers Say...

Testimonial Pembroke Castle
"Thank you for our new IP phone system. Our old phone system probably was installed when the castle was built and was just not up to scratch. Now we have clear communication not just within our castle complex but also with our customers and others who ring us. Your professionalism and the proficiency of your installation team is much appreciated."

Testimonial DO Systems
"At DO Systems we deal with a lot of sensitive information and we have stringent security measures in place. One of these measures is the fact that we need to have strict control of who enters the building and that we have a log of who comes in and when."

Secure-I-T installed an access control system that gave us full control of who can come in and out, when they can do so and also to what areas of the building they can go.

I.T Support Wales Deserves

Secure-I-T based in Pembrokeshire pride themselves on the after sale support they provide. We have many years experience in working with the companies that supply us with hardware and software and we believe you should have the support you deserve.

DEDICATED MICROS

Thankfully we live in a relatively low crime area but there has been a recent rise in theft from homes, outbuildings and farms.

We install CCTV systems that will record incidents you may have, and that have remote accessibility, so you can monitor what is going on without having to be there.

Smart CCTV

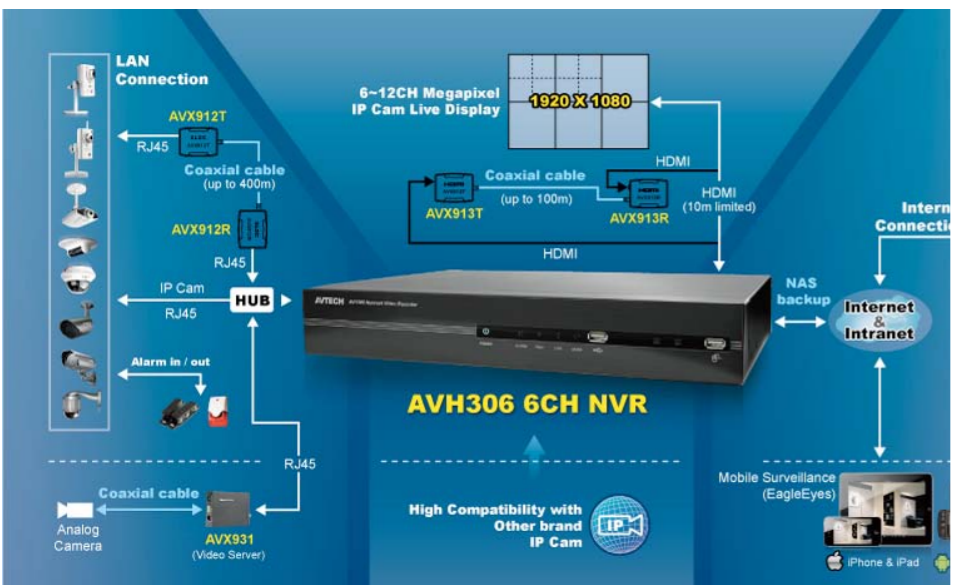

ANPR - Tracking - Analytic CCTV

HD I.P CCTV

High Definition Internet Protocol CCTV

IP CCTV allows you to integrate your security into your established network. Settings are more accessible and configurable. Extra cameras can be added easily, making your IP CCTV system more flexible.

Remote administration is possible from anywhere with Internet connection.

CCTV Accessories

CCTV Cameras

HD SDI CCTV

High-definition serial digital interface CCTV

HD SDI allows you to install HD CCTV in full 1080P, all this without having to upgrade your existing cabling. This keeps the cost of upgrading as low as possible. Hybrid DVRs give you the option of only having to upgrade part of your system to HD.

Pictures are such high quality that you can zoom in on post event footage and get twice the detail, something that ordinary analogue CCTV can not do.

Alarm Systems

Intruder - Panic - Environment - Fridge/Freezer

A choice of domestic, industrial, wired and wireless alarms.

Smart technology that eliminates false alarms.

Dialer function that notifies you when there is activation when you are away from your property.

Simple arming and disarming.

Cameras with Alert via Push Video or MMS to Mobile device

Protection, Automation & Communication to simplify the day to day running of your business or remote sites.

Protect your Stock

Environment

Fridge

Panic

Automation

Put the power of remote home automation at your fingertips with an EasySwitch.

Access Control

Time and Attendance, Fireroll

High level of security.

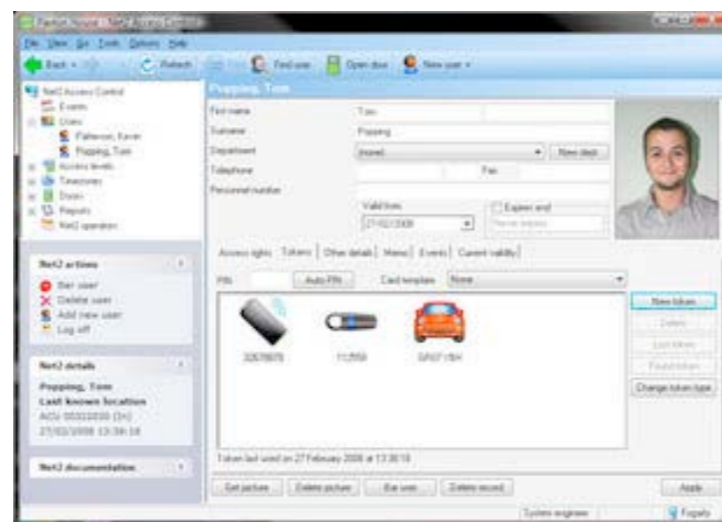

No more changing locks or worrying about lost keys. If a keycard is lost it can easily be removed from database and another one issued.

Ideal for recording time and attendance and for controlling who can go where within your building.

Automatic barriers, bollards and gate systems provide monitored vehicle access.

Britain's Favourite Seaside Holiday

Wifi

Wireless BroadBand

There is a rising demand from guests for Internet connectivity throughout your entire premises.

This provides you with the opportunity to increase visitors by offering FREE access or to receive extra ongoing revenue for your business.

Customer access can be managed with a Ticket Printing option or through a landing page that takes digital payment such as PayPal.

Provide a valuable service to your customers and increase your company's profile.

Networks

Small Business Networks

Reliable & Secure Technology from all the leading brands

Visual

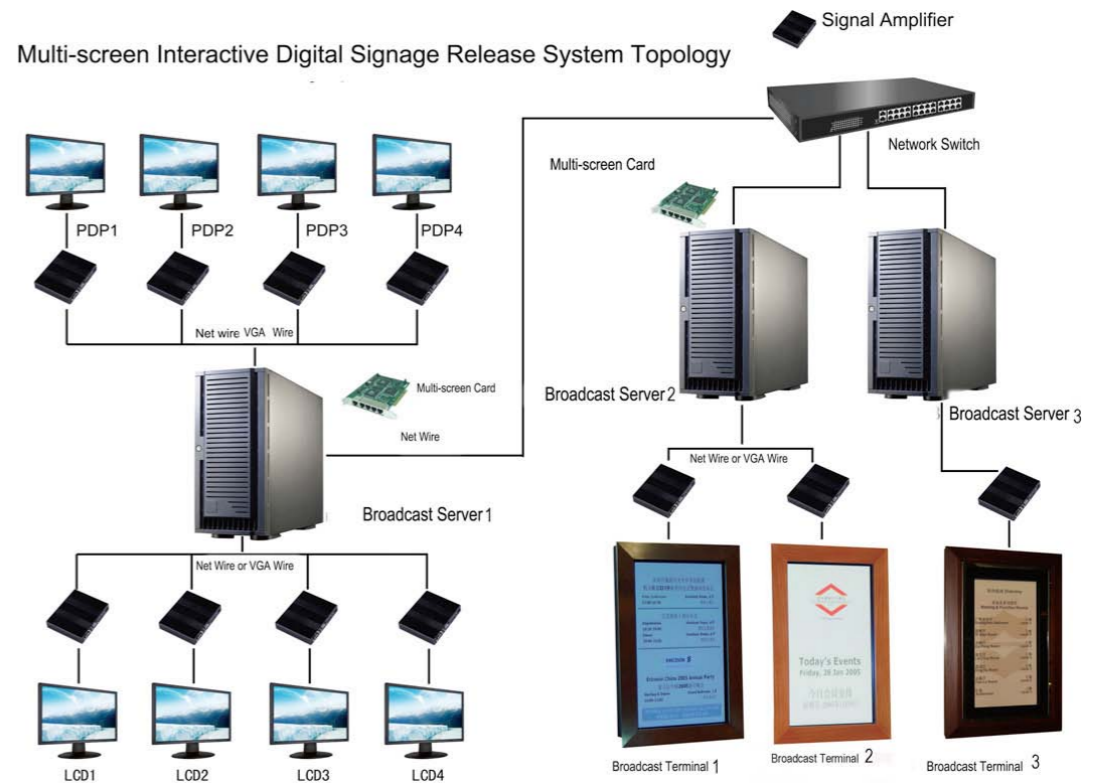

Save Money & the Environment by switching to LED for P.C & Display Screens

LCD, LED and plasma TV power consumption

Plasma	42 inch	9	221 watts	145-337 watts
